PART 1, FEBRUARY 1993

Research Articles

Initiation of antigen receptor endocytosis and B lymphocyte activation lie on independent biochemical pathways
R. L. Shuler and C. S. Owen 1

Studies on the antibody response of mice and humans after immunization with potential influenza virus A (H1N1) vaccines
P. Poumbourios, J. S. Oxford and D. C. Jackson 13

An analysis of the relationship between γδ T cell receptor V gene usage and non-major histocompatibility complex-restricted cytotoxicity
N. Mavaddat, B. W. S. Robinson, A. H. Rose, L. S. Manning and M. J. Garlepp 27

Multiple levels of post-transcriptional regulation of collagenase (matrix metalloproteinase 1) in an epithelial cell line
J. M. Whitelock, M. L. Paine, J. R. Gibbins, R. F. Kefford and R. L. O'Grady 39

Theoretical Articles

The trophoblast as an integral component of a macrophage–cytokine network
L. Guilbert, S. A. Robertson and T. G. Wegmann 49

Adhesive interactions in thymic development: Does selective expression of CD45 isoforms promote stage-specific microclustering in the assembly of functional adhesive complexes on differentiating T lineage lymphocytes?
L. M. Pilarski 59

Brief Communication

Transient retention of *Strongyloides ratti* in the caecal mucosa during infection in mice
T. Abe, K. Yoshimura and Y. Nawa 71

PART 2, APRIL 1993

Research Articles

Electroporation and DNA-dependent cell death in murine macrophages
K. J. Stacey, I. L. Ross and D. A. Hume 75

Human natural killer (NK) cells: Requirements for cell proliferation and expansion of phenotypically novel subpopulations
H. S. Warren, B. F. Kinnear and L. J. Skipsey 87

Reduced secretion of IL-1β by peritoneal cells from patients on continuous ambulatory peritoneal dialysis
P. S. Hart, C. A. Jones, K. L. Jones and J. J. Finlay-Jones 99

Specific targeting of *in vitro*-activated human antitumour effector cells using anti-CD3 × anti-c-*erbB*-2 bispecific antibody
H. Tsukamoto, Y. Nakamura, T. Masuko, Y. Hashimoto, S. Habu and T. Nishimura 109

Technetium-99 m labelling of DD-3B6/22 antifibrin monoclonal antibody fragment Fab′ for thrombus imaging
F-T. Lee, G. R. Boniface, R. M. Lambrecht, D. B. Rylatt and P. G. Bundesen 117

In vivo inhibition of the rat primary antibody response to antigenic stimulation by somatostatin
A. Eglezos, P. V. Andrews and R. D. Helme 125

Theoretical Articles

A re-examination of the molecular basis of cell movement
P. A. Tooney, M. V. Agrez and G. F. Burns 131

Selective modification and immune evasion: A hypothesis
S. Kumar 141

Brief Communication

Alteration within a discrete region of the H-2L^d α_1 helix upon association with human β_2 microglobulin
M. J. Smith, T. Basora, J. E. Kieran and M. C. Nieto 145

Book Reviews 151

PART 3, JUNE 1993

Research Articles

Characterization of thymic involution induced by murine cytomegalovirus infection
P. Price, S. D. Olver, A. E. Gibbons, H. K. Teo and G. R. Shellam 155

Immunochemotherapy of human colon carcinoma xenografts in nude mice using combinations of idarubicin-monoclonal antibody conjugates
M. J. Smyth, H. McA. Foster, S. M. Andrew, J. Ghee Teh, K. Krauer, I. F. C. McKenzie and G. A. Pietersz 167

Inhibition of burn-associated suppressor cell generation by glycyrrhizin through the induction of contrasuppressor T cells
M. Kobayashi, D. A. Schmitt, T. Utsunomiya, R. B. Pollard and F. Suzuki 181

Gastric parietal cell development: Expression of the H^+/K^+ ATPase subunits coincides with the biogenesis of the secretory membranes
J. M. Pettitt, B-H. Toh, J. M. Callaghan, P. A. Gleeson and I. R. Van Driel 191

Theoretical Articles

Killing by cytotoxic T cells and natural killer cells: Multiple granule serine proteases as initiators of DNA fragmentation
J. A. Trapani and M. J. Smyth 201

The maintenance of self-tolerance
K. J. Lafferty and R. G. Gill 209

Brief Communications

Detection of mosaic protein mRNA in human astrocytes
V. M. Avery, D. L. Adrian and D. L. Gordon 215

Patterns of resistance to *Candida albicans* in inbred mouse strains
R. B. Ashman, E. M. Bolitho and J. M. Papadimitriou 221

Origin and maintenance of germ-line V genes
H. S. Rothenfluh and E. J. Steele 227

Book Reviews 233

PART 4, AUGUST 1993

Research Articles

Differences in antigen-binding affinity caused by a single amino acid substitution in the variable region of the heavy chain
J. Xiang, Z. Chen, L. T. J. Delbaere and E. Liu 239

Vitamin D-binding protein (group-specific component) is the sole serum protein required for macrophage activation after treatment of peritoneal cells with lysophosphatidylcholine
S. Homma, M. Yamamoto and N. Yamamoto 249

Cytokine production in response to Epstein-Barr virus infection of peripheral blood mononuclear cells *in vitro*
S. Whittingham, G. Naselli, L. C. Harrison, A. W. Boyd, J. Cebon and I. Jack 259

Activated CD19$^+$ B cell lamina propria lymphocytes in ulcerative colitis
B. R. Yacyshyn 265

Interleukin-6 production during chronic experimental infection
B. M. Saunders, Z. Liu, Y. Zhan and C. Cheers 275

Expression of membrane receptor for tumour necrosis factor on human blood lymphocytes
H. Zola, L. Flego and H. Weedon 281

CD45 isoform transitions on multinegative human thymocytes differentiating *in vitro* mimic patterns predicted for selective events *in vivo*
L. M. Pilarski and J. P. Deans 289

Production of transferrin by human cell-lines in a defined protein-free system: Detection by ELISA
K. Kriegerbeckova, J. Kovář and V. Neumannová 303

Tumour-specific CTL response requiring interaction of four different cell types and recognition of MHC class I and class II restricted tumour antigens
V. Schirrmacher, H-J. Schild, B. Gückel and P. von Hoegen 311

Theoretical Articles

Images of self: A model for tonic peripheral tolerance
G. Rudy and A. M. Lew 327

Control of clonal deletion in the thymus: Implications for tolerance induction
M. Hartwig 337

Brief Communications

Molecular cloning and characterization of a ruminant interleukin-6 cDNA
A. E. Andrews, G. J. Barcham, K. Ashman, E. N. T. Meeusen, M. R. Brandon and A. D. Nash 341

Immunosuppressive antibody treatment prolongs graft survival in two murine models of segmental pancreas transplantation
L. J Purcell, P. L. Mottram and T. E. Mandel 349

Book Reviews 353

PART 5, OCTOBER 1993

Special Issue: Recent Developments in Veterinary Vaccines

High and low responsiveness to vaccines in farm animals
P. M. Outteridge 355

Recombinant cytokines as immunological adjuvants
A. D. Nash, S. A. Lofthouse, G. J. Barcham, H. J. Jacobs, K. Ashman, E. N. T. Meeusen, M. R. Brandon and A. E. Andrews 367

Genetically engineered multi-component virus-like particles as veterinary vaccines
L. D. Pearson and P. Roy 381

Recombinant fowlpox virus vaccines for poultry
D. B. Boyle and H. G. Heine 391

Recombinant viral vaccines for enzootic bovine leucosis
R. C. W. Daniel, M. H. Gatei, M. F. Good, D. B. Boyle and M. F. Lavin 399

Bovine herpesvirus-1 vaccines
S. van Drunen Littel-van den Hurk, S. K. Tikoo, X. Liang and L. A. Babiuk 405

Circumvention of maternal antibody interference by immunization of newborn pigs with glycoprotein gIII-deleted marker vaccine
S. Kit, S. McConnell, M. Kit and B. Lawhorn 421

Vaccination against tuberculosis: Is BCG more sinned against than sinner?
J. F. T. Griffin and G. S. Buchan 431

Vaccination against cestode parasites
M. W. Lightowlers and M. D. Rickard 443

Vaccination against *Lucilia cuprina*: The causative agent of sheep blowfly strike
I. J. East and C. H. Eisemann 453

Production of vaccines against gastrointestinal nematodes of livestock
D. L. Emery, S. J. McClure and B. M. Wagland 463

Recombinant vaccines against ovine footrot
T. J. O'Meara, J. R. Egerton and H. W. Raadsma 473

Immunological approaches to fertility regulation in domestic livestock
R. J. Scaramuzzi, B. K. Campbell and G. B. Martin 489

Immunocastration of colts and immunospeying of fillies
K. F. Dowsett, U. Tshewang, L. M. Knott, A. E. Jackson and T. E. Trigg 501

PART 6, DECEMBER 1993

Research Articles

Production of interleukin-1α and interleukin-2 by separate, phenotypically different leukaemia and human T cell lymphotropic virus-1-transformed cell clones
V. Holáň and J. Minowada 509

Effect of cationization on anti-hapten antibody responses in sheep and mice
K. G. Altmann 517

The stimulation by dendritic cells of host-versus-graft reactivity *in vivo*
S. Chaudhuri, Swapna Chaudhuri, R. Barfoot, S. Denham and J. G. Hall 527

Functional and phenotypic assessment of neonatal human leucocytes expressing natural killer cell-associated antigens
K. F. Bradstock, C. Luxford and P. G. Grimsley 535

T cell receptor polymorphisms in Caucasians and Polynesians
W. G. H. Abbott, P. L. J. Tan, M. A. Skinner, J. Marbrook, J. S. Peake, D. G. Woodfield and A. Geursen 543

A comprehensive analysis of peripheral blood lymphocytes in healthy aged humans by flow cytometry
X. Xu, I. Beckman, M. Ahern and J. Bradley 549

BCG vaccination in deer: Distinctions between delayed type hypersensitivity and laboratory parameters of immunity
J. F. T. Griffin, J. B. Hesketh, C. G. Mackintosh, Y-E. Shi and G. S. Buchan 559

Differential expression of surface antigens on activated endothelium
E. J. Favaloro 571

Theoretical Article

Interferon-gamma and interleukin-4 in human *Leishmania donovani* infections
M. Kemp, J. A. L. Kurtzhals, A. Kharazmi and T. G. Theander 583

Book Reviews 589
